

SELF BELAY

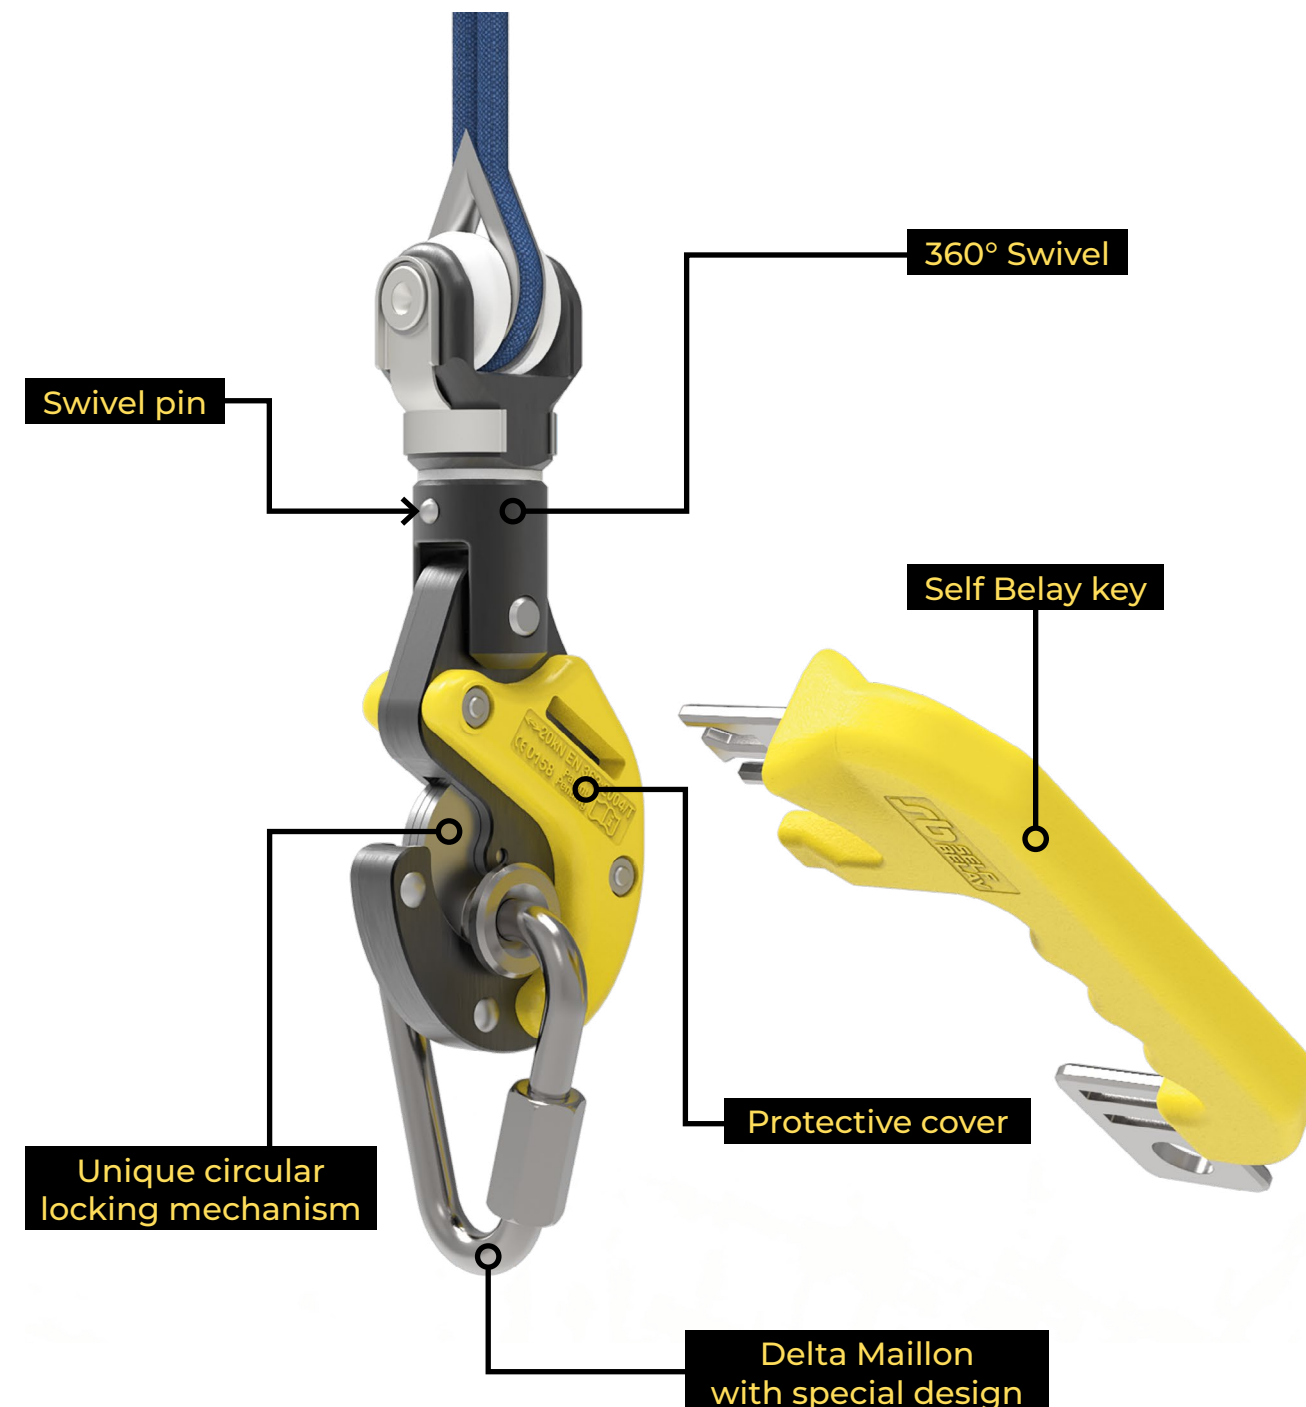

The Most Reliable Climbing Connector

a brand of **safety**
ENGINEERING

The Self Belay

The Self Belay is an innovative patent-awarded climbing connector that increases safety and eases operation.

First introduced in Family Entertainment and Adventure centres, the Self Belay proved just as valuable for traditional Climbing Gyms and Trampoline parks over the years. The Self Belay is popular throughout the world and is cherished by some of the best in the business, including Urban Air, Headrush Technologies, HAPIK, Perfect Descent, Rock Up and Funtopia.

Why Self Belay?

Minimises clipping errors

The Self Belay minimises clipping errors and eases the clipping and un-clipping process with its unique circular locking mechanism.

Easy to use by children

Children as young as 5-years old can easily use the Self Belay on their own as using it requires no physical strength.

Eliminates webbing & rope twisting

The Self Belay swivel rotates at 360° and eliminates webbing twisting, ensuring a safer experience for the climber.

Reduces the staff required by half

Centers that use the Self Belay can reduce their staff by 50%, compared to centers where only simple carabiners are used.

Who Are We?

Safety Engineering Ltd. was founded in 2012 with the mission to meet the growing need for safety-related products for climbing activities. Protecting the life of visitors at climbing and adventure facilities is our first priority. The numbers speak for themselves – **each and every year, our products are the reason for 19 million safe descents of climbers worldwide.**
